

SYSTEM KAN-therm

Push

Over 25 years of experience in production, assembly and operation of the System KAN-therm Push gave us solid grounds for implementation of unique "ONE STEP"* expanding heads for PE-RT and PE-Xc pipes.

FULL IDENTIFICATION OF DIAMETERS WITH COLOUR CODING!!

KEY ADVANTAGES:

- Assembly - „one step“* expansion at the same time for quicker and easier assembly.
- Easier and quicker identification of diameters with colour coding (colour marking of connectors and tools).
- New, innovative, 8-segment design of the heads.*
- New enhanced thermal treatment technology used in manufacturing of the heads.
- The set is provided in practical and ergonomic packaging suitable for construction site conditions.

*Applies to diameters 14-25 mm.

TECHNOLOGY OF SUCCESS

ISO 9001

Unique design of "one step"* heads

Innovative, 8-segment design of the heads for save assembly without any risk of damage when expanding "ONE STEP".

Heads protected against construction site conditions with special plastic packaging.

New design of the expanding heads enables quick and safe assembly by making it possible to expand the pipe tip in one, so called "ONE STEP"* expanding cycle.

New "ONE STEP"* expanding heads and mould inserts (black and nickel) marked with different colours, each for specific pipe diameter.

*Applies to diameters 14-25 mm.

New metal thermal treatment technology to extend useful life of the heads.

Full identification of System KAN-therm Push diameters for more convenient assembly
