SYSTEM **KAN-therm**

# bluePERT

KAN-therm bluePERT pipe is a high quality five-layer product designed for low-temperature water surface heating and cooling.

[www.kan-therm.com](http://www.kan-therm.com)

EN 24705

# Advantages

- 1** More than 50 years of operational life.
- 2** Wide diameter range from 12 mm to 25 mm.
- 3** The EVOH anti-diffusion layer protects the metal components of the installation from the risk of corrosion.
- 4** The EVOH anti-diffusion layer is perfectly protected from damage during installation by the five-layer construction of the pipe.
- 5** Easy and convenient assembly thanks to the use of extremely flexible polyethylene PE-RT (Type I).
- 6** 10 year guarantee.
- 7** Materials of the highest quality.
- 8** The product is inspected and tested in KAN professional laboratory.
- 9** The shape memory phenomenon effectively prevents the adverse effects of crimping and narrowing of the pipe diameter.
