About KAN

Install your future

KAN is a recognised in Europe manufacturer of System KAN-therm - the most modern system for indoor water, central heating, floor heating, firefighting and technological installations.

We owe our current leading position to acting based on four strong pillars: uncompromised quality, innovative solutions, many years of experience and professionalism noticeable at all stages.

The continuous development of System KAN-therm is a part of our philosophy - we make all effort to offer our users a product at the highest technical level, meeting all expectations related to it, providing comfort of use and perfect functioning of the installation and, thus, the feeling of complete safety. Bearing in mind health of the users, we provide highest quality products, produced and used without any conflict with the natural environment, friendly in relation to people and surrounding.

System KAN-therm features a perfect implementation of the vision of a universal system, backed by many years of experience and passion of KAN constructors as well as strict quality control of materials and the end products. Therefore, System KAN-therm remains the unchallenged leader among the installation systems in Poland and is increasingly popular abroad. Products designated with the KAN-therm mark are exported to almost 60 countries of Europe, Asia, Middle East and Africa.

The new KAN-therm Hungary Kft company is an answer to the increasing interest in our offer in Southern and Central Europe. The purpose of the warehouse and the new office is not only to store goods and prepare offers, but also to facilitate the professional order handling not only from Hungary, but also from Albania, Bosnia and Hercegovina, Bulgaria, Croatia, Czechia, Kosovo, Macedonia, Romania, Serbia, Slovakia or Slovenia.
